The ultimate picture quality

The Ultimate Processor

With unmatched processing power, the Picture Processor X1™ Ultimate detects hundreds of different objects on-screen and intelligently enhances brightness, detail and color so everything you watch is clear, bright and incredibly realistic.

X1
Ultimate

X1
4K Processor

Beautiful colours, contrast with fine details

X1
4K HDR Processor

Everything you watch is closer to 4K, life-like experience.

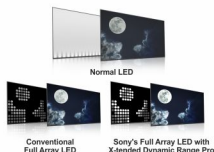

X1
Ultimate

The Ultimate Processor

8K X-tended Dynamic Range PRO **4K X-tended Dynamic Range PRO** **4K X-tended Dynamic Range**

Discover how real pictures can be when you bring out the fine details. With zones of LEDs lit independently, Full Array LED provides more realistic contrast by making light areas lighter and dark areas darker. Contrast is further enhanced by X-tended Dynamic Range™ PRO, which adjusts brightness for higher peaks in glare and deeper blacks in shadow.

8K X-Reality PRO **4K X-Reality PRO**

Like you're within the wave, waiting for the water to break over you, the 4K HDR Processor X1™ reproduces sparkling pattern and texture for incredible realism. With object-based HDR re-master and Super Bit Mapping™ our processor gives pure colours at higher brightness levels for truly natural pictures. See everything you watch come to life with greater depth, detail and texture.

With LIVE COLOUR

Ambient optimization

Brightness refined for your room

On conventional TVs, brightness stays the same regardless of light in a room, resulting in pictures that are too dark or bright. TV includes an embedded light sensor that optimises picture brightness to room conditions, boosting brightness in light rooms and reducing it in dark ones, so you get the perfect view.

**Lifelike details with
Unlimited content**

High Dynamic Range (HDR) is the new standard for picture quality, offering a much wider range of colour, contrast and clarity.

**Transform your gaming
experience with 4K 120**

Smooth & Clear movement for responsive gameplay. Super-Fast response with low input lag. Enjoy gaming with incredible picture quality.

Beautiful colours from all sides

Watching TV from the sides is now as satisfying as from the centre. Sony's original optical design to control light from the backlight, the X-Wide Angle panel ensures colours stay true from wherever you're watching.

X-Wide Angle

Without
X-Wide Angle

With
X-Wide Angle

Making fast-moving scenes bright and clear

On some screens, sports and fast action scenes can seem to go by in a blur. Our latest X-Motion Clarity™ technology keeps everything smooth, bright and clear. Each blink is individually controlled and its duration optimised, while brightness is boosted when needed, so you won't miss a thing.

X Motion Clarity

Without
X-Motion Clarity

With
X-Motion Clarity

The realistic sensation that the image and sound are produced as one.

Sony's unique technology creates a new viewing experience that combines video and sound.

On the big screen, you can enjoy beautiful images and sounds to your heart's content.

Acoustic Surface Audio+

The screen is the speaker

Exclusive to Sony, specially designed actuators invisibly vibrate the TV panel to create amazing sound coming directly from the screen, for a perfect unification of audio and picture.

Acoustic Multi-Audio

**Sound from the screen,
just like being there**

Our Acoustic Multi-Audio™ system adds two sound-positioning tweeters in the rear of the TV to the bass reflex speakers for Sound-from-Picture Reality™. With action and sound precisely aligned, your viewing becomes so much more immersive.

Upgrade your sound experience - Sound-from-Picture Reality™

S-FORCE FRONT SURROUND

Enjoy multidimensional sound with S-Force Front Surround

Hear sound as you would from a separate multi surround speaker. By upconverting inputs, S-Force Front Surround virtually reproduces a multi surround speaker system within your TV so you can enjoy all the thrills of more immersive sound.

Voice Zoom

Clearly hear voices

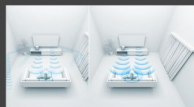

With Voice Zoom, you can hear human speech clearly without having to turn up the volume—ideal for news bulletins and documentaries.

Ambient Optimization

Sound tailored to your environment

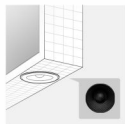

Sound experience can change depending on your room environment. For example, curtains absorb sound, while objects in front of the TV can disturb the passage of sound, compromising the quality of what you hear. TV detects objects and reproduces sound that's enhanced and optimised to your room.

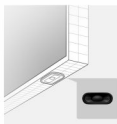

Hear high quality sound

Designed to complement the sound quality and slimness of the TV with its unique new shape, our X-balanced speaker drives movies and music with clear sound.

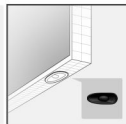

This feature is available on TVs larger than 55 (139cm)

Conventional round speaker
Sound quality is good but TV design is not slim

Thin oval speaker
Sound quality has been compromised to make the TV slim

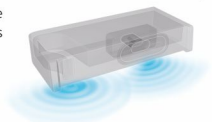

X-Balanced Speaker
High quality sound in an ultra thin TV design

X-Balanced Speaker

Bigger, better bass

Hear more from a compact speaker box with an intense and focused sound. The bass reflex speaker produces clear, rich sounds from crisp highs to extended lows.

Bass Reflex Speaker

Powerful sound, finely balanced

With Dynamic Drive Speaker™, bring your movies and music to life. Sound is clear and balanced with powerful bass, thanks to a strong force from a neodymium magnet.

Dynamic Drive Speaker
